CUTTING EDGES

Crafted with 500 Brinell Steel, genuine Volvo cutting edges deliver unparalleled performance in heavy wearing applications like Mining or Earthmoving.

In contrast, local alternatives often utilise softer steel (400 and below rated Brinell Steel) and a mix of varying strength materials, sacrificing quality for a lower price point.

Volvo edges are designed in 3 pieces, allowing users to rotate the edge once it begins to wear, effectively doubling its service life compared to locally made one-piece units.

Choose Volvo cutting edges for superior quality, durability, and performance that exceeds your expectations.

PINS & BUSHINGS

Elevate your fleet's performance with updated Pins and Bushings – a crucial investment for optimal operation.

Engineered by Volvo, our genuine pins and bushings are meticulously designed to endure the toughest conditions, ensuring unmatched wear life and seamless operation when paired with Volvo lubricants. Despite their simplicity, these components are the backbone of your machine's functionality, enabling precise movements essential for digging, grading, loading, placement, and steering.

Choose Genuine Volvo Parts for the perfect match and quality assurance, guaranteeing longevity and peak performance.

Air Filters

Gear up for summer success and beat the heat and dust with new inner and outer engine air filters, and main and primary cab filters.

These four essential filters are prone to clogging during dry, hot weather and on job sites prone to high dust levels, which can lead to operator discomfort.

Available in convenient packs or as individual items tailored to your machine's engine type, this promotion covers all models of EXC, WLO, and ADT.

Don't let summer slowdowns hold you back – stay cool, clean, and efficient with Genuine Volvo Air Filters.
